

Scale: 1 cm = 1 m

- 1) What's the total area of the house and terrace?
- 2) The house sits on a block of land with an area of 800 m^2 . What fraction of the land is taken by the house? (extension: What's the percentage?)
- 3) What's the cost of carpeting the house at $\text{£}40$ per m^2 ? (not including the bathroom or terrace)

Extension:

Draw an aerial view of your place.

Homework:

Calculate the area of each room in your house.
What's the total area of your house?
