## Theme Based Study Sheet

### Ocean creatures

On a separate page, list twelve animals that live in the ocean.

Select one animal and write a short report about problems that animal may face today or in the future. Problems may include over fishing or pollution.

### Salty science experiment

Put 200mls of water in a container.

Add one teaspoon of salt to the water and stir.

As soon as the salt disappears, add another teaspoon of salt and stir again.

Keep adding salt until it no longer dissolves.

How many teaspoons of salt did you manage to dissolve in the water?

Predict how much salt you could dissolve in 500 mls of water.

Repeat the experiment using 500 mls of water.

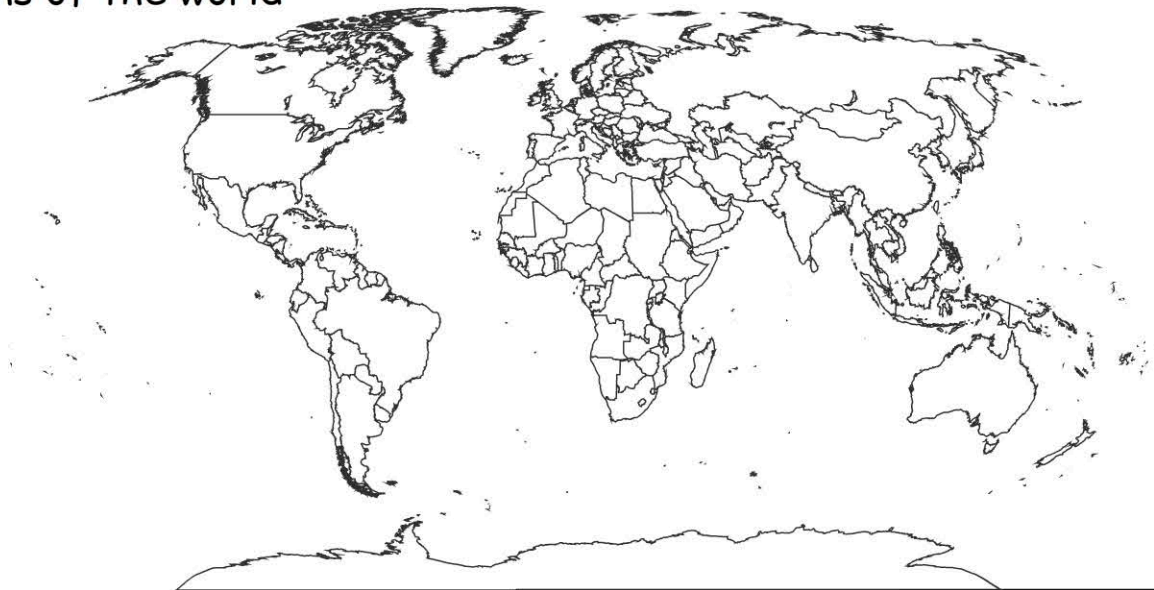

How accurate was your prediction?

### Word meanings

On a separate page, write each of these words in a sentence.

salty	depth
brine	deep
tide	sea
shallow	current

### Oceans of the world

Label these oceans on the map.

Arctic      Atlantic      Southern  
Indian      Pacific

Which is the largest ocean? Which is smallest?

Which ocean is closest to where you live?
