

# SEPARATING SALT FROM SALTY WATER

Name:

Date:

## Aim:

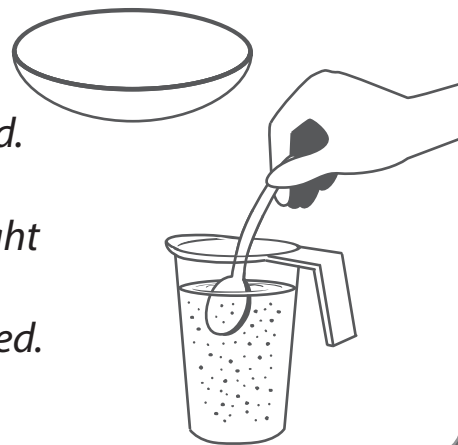

To explain how evaporation plays a role in separating salts that are dissolved in water.

## Materials Needed:

Shallow bowl, measuring cup, water, table salt, spoon.

## What to do:

- 1) Place one cup of water in a measuring cup.
- 2) Spoon in a tablespoon of salt and stir until dissolved.
- 3) Pour salty water into a shallow bowl.
- 4) Place the bowl in direct sunlight. Leave in the sunlight until water is completely evaporated.
- 5) Examine the bowl after all the water has disappeared.

## Results:

## Conclusion:
