

How To Master Numeracy

Goal

To develop confidence and excellence in number skills creating a foundation for success in mathematics.

Getting started

1. **Select a starting point for each student:** There are 83 sequential number skills, students start at the level recommended by their teacher/parent.
2. **Print or use online:** for instant feedback and rewards that help students as they work.
3. **Regular 10 min testing:**
 - Use the printable worksheets provided to test students regularly.
 - Each worksheet is randomly generated so the questions are always different.
 - Use the timer provided to run regular tests.
 - Students move to the next level once a skill is mastered.
 - To master a skill, students need to achieve 100% correct within a 10-minute period.
 - A recording sheet is provided to track test results.

Benefits

- Teachers can match activities to individual student needs.
- Students start at a level they are comfortable to work at.
- Students progress at their own pace.
- Encourages acquisition of lifelong number skills.
- Students do not need to have a Studyladder account.
- Students who do log-in receive virtual rewards for every correct answer.
- Progress reports are saved for parents and teachers if students are logged in.
